

GETTING THE RIGHT TREE TO THE RIGHT MARKET

BUT CAN YOU GROW IT FIRST WITHOUT THE DEER EATING IT?

A NORTH EAST SCOTLAND FORESTRY & TIMBER TECHNOLOGIES INDUSTRY REGIONAL EVENT

5.15pm buffet for 6pm meeting

Wednesday 28th September 2016

The Gordon Arms Hotel, Huntly, AB54 8AF

We are constantly encouraged to grow more diverse species, and there may be new opportunities for farmers to plant some of their land, but do we need a deer control group to get the population under sufficient control to grow those trees, and then get them to the right market – more efficiently than at present?

Attendance is FREE but prior registration is required

A light buffet supper will be provided from 5.15pm before the meeting kicks off at 6pm under the chairmanship of Will Anderson of Seafeld Estates. Presentations will include:

- **Forestry Grant Scheme and Sheep & Trees updates** – from Grampian Conservancy
- **Deer control and forming a new low-ground Deer Control Group** – from reps involved with the LDNS (Lowland Deer Network Scotland)
- **Getting the right tree to the right market** – David Leslie from James Jones & Sons Ltd will explain what they are doing with the latest technology such as Navman to improve efficiency within the supply chain
- **Industry updates** – from Confor and the Industry Leadership Group

To book your place, please complete the attached form and return it to Ann Stewart – ann.stewart@confor.org.uk advising of any dietary requirements.

And please give us your suggestions for future meetings.
