

## Glyphosate - withdrawn products

here are currently some 300 glyphosate products with UK approval for use in the forest. However, when glyphosate gained a temporary re-approval last summer, it was on the basis that sales of all glyphosate products containing the ethoxylated tallow amine adjuvant would be revoked on 30 June 2017, with use by the forester permitted until 30 June 2018.

This will affect products such as Clinic Ace, Glyfos, Rosate 36 and Stirrup. So now is the time to check the chemical store for any of the revoked products, and ensure that they are used within the next 12 months. It is important to check not only the product name, but also the MAPP number, as a number of products have retained the same name, but have a different MAPP number as they have been reformulated without tallowamine, and the new formulation may, of course, be used. These products are shown with an asterisk in the list of revoked products below. Other products remain by with slightly different names - for example with "XL" or "Pro" added to the original name. The popular Clinic Ace, falls into this category with the replacement material now available as Clinic UP.

## MEMBER SERVICES

## Pesticides helpline

If you haven't used the service to date, be assured it is a free service operated by Confor's crop protection adviser Colin Palmer on behalf of Confor members. Colin can be contacted 8am to 8pm Mondays to Fridays on 01531 633500 (leave a message if necessary) or by email to:

forestry@branchline.demon.co.uk

Glyphosate products with UK forest approval which will no longer be permitted to be used after 30 June 2018

\* Reformulated with a new MAPP number.

Other well regarded glyphosate products such as Roundup ProActive and Roundup ProVantage are unaffected by these changes. A decision on the long term future of glyphosate in Europe is expected later in the year.
