

**EXTENSION OF AUTHORISATION FOR A MINOR USE OF A PLANT
PROTECTION PRODUCT**

PLANT PROTECTION PRODUCTS REGULATION No 1107/2009

Extent of authorisation: Great Britain Only

Product name: Gazelle SG

Active ingredient: 20 % w/w acetamiprid

MAPP number: 20034

Product authorisation holder: Nisso Chemical Europe GmbH (Registered
Company no. HRB 28513)

Marketing company: Certis Belchim B.V.

This Extension of authorisation ends: on the final expiry date of use for the
authorised product

If the authorisation of the above product is withdrawn or amended, this Extension of
authorisation will end on the same date as the authorisation for the product.

This Extension of authorisation will be withdrawn or amended before its end date if
any of the active substances contained in the product are withdrawn from the GB
Approvals Register, or if a decision is taken to withdraw or amend this Extension of
authorisation under Regulation No 1107/2009 on any other grounds.

The circumstances in which this Extension of authorisation will be withdrawn or
amended are set out in Regulation No 1107/2009.

This extension of authorisation for minor uses applies to all authorised parallel trade
products issued under Article 52 of Regulation No 1107/2009 for which Gazelle SG
with MAPP 20034 is the reference product.

HSE Digital Signature

This and the attached Appendices 1 and 2 are signed by the Health and Safety Executive for and on behalf of the Secretary of State, the Welsh Ministers and the Scottish Ministers.

Date of issue: 9 July 2026

EXPLANATORY NOTES

1. This is Extension of authorisation number 1460 of 2026.
2. This Extension of authorisation will be published on HSE's website.
3. Application reference number: COP 2025/01265
4. Persons using the product to which this Extension of authorisation applies should acquaint themselves with and observe all requirements contained in the Regulation No 1107/2009, including the duty on the holder of any Extension of authorisation to notify information on potentially dangerous effects, a contravention of which is a criminal offence under those Regulations.
5. Neither the efficacy nor the phytotoxicity of the product for which this Extension of authorisation has been granted has been assessed and, as such, the user bears the risk in respect of failures concerning its efficacy and phytotoxicity.
6. In this notice Regulation No 1107/2009 means:
In relation to Great Britain, Assimilated Regulation No 1107/2009 as it has effect in Great Britain.

ADVISORY INFORMATION

This Extension of authorisation relates to the use of 'Gazelle SG' (M20034) in ornamental plant production in permanent protection with full enclosure for control of Large Pine Weevil (*Hylobius abietis*). Application via an enclosed spray cabinet within an industrial building (with local exhaust ventilation) in a water volume of 1.5 - 20 ml/tree.

IMPORTANT: Goods treated under the terms of this Great Britain (GB) only authorisation can be legally marketed in Northern Ireland if they are being moved under the Northern Ireland Retail Movement Scheme. All other treated goods can only be marketed in Northern Ireland if they are in accordance with the statutory EU Maximum Residue Level (MRL) set under Regulation (EC) No 396/2005. This may also apply to residues in animal products where treated crops are fed to livestock. Growers are advised to draw this to the attention of distributors and retailers so that EU MRL breaches and any associated enforcement against goods marketed in Northern Ireland are avoided.

IMPORTANT: When applying this product under the terms of this Extension of authorisation, comply with any resistance guidance or restrictions stated on the product label.

Total reliance on one pesticide will hasten the development of resistance. Pesticides of different chemical types or alternative control measures should be included in the planned programme. Alternating with different modes of action is a recognised antiresistance strategy.

Total reliance on one pesticide will hasten the development of resistance. Acetamprid is Group 4A insecticide, adopt a window strategy by limiting Group 4 treatments onto one generation of the target pest, and switching to other modes of action in the subsequent generation where further sprays are required. Avoid using Group 4 compounds for more than 50% of the total crop cycle

APPENDIX 1: CONDITIONS OF EXTENSION OF AUTHORISATION

The conditions below are obligatory. They must be complied with when the Extension of authorisation occurs. Failure to comply with the following conditions will be likely to result in the withdrawal or amendment of the Extension of authorisation under Regulation No 1107/2009 and may result in other enforcement action, including prosecution. For the purposes of this Extension of authorisation only, the conditions and/or requirements shown below supersede any corresponding conditions and/or requirements set out on the label or otherwise provided for under the product authorisation **which would otherwise apply**.

Use:

Field of use: **ONLY AS AN INSECTICIDE**

User: Professional

Crops/situations:	Maximum individual dose: (g product / tree)	Maximum total dose:	Maximum number of treatments: (per year)	Latest time of application:
Permanent protection with full enclosure ornamental plant production	0.185	-	1	Post lifting

Operator Protection:

- (1) Engineering control of operator exposure must be used where reasonably practicable in addition to the following personal protective equipment:
 - (a) Operators must wear suitable protective gloves when handling the product or handling contaminated surfaces.
 - (b) Operators must wear suitable protective clothing (coveralls), suitable protective gloves and rubber boots when handling freshly treated material.
 - (c) Workers must wear suitable protective clothing (coveralls) and suitable protective gloves when handling treated material.

- (2) However, engineering controls must replace personal protective equipment if a COSHH assessment shows that they provide an equal or higher standard of protection.

Other specific restrictions:

- (1) This product must only be applied in accordance with the terms of this extension of authorisation, the product label and/or leaflet and any additional guidance on extensions of authorisation.
- (2) For use only on forest nursery container grown plugs and bare rooted transplants post lifting.
- (3) Only for crops grown in organic media, such as soil or compost, either in containers or on impervious surfaces
- (4) Treatment must only be made under 'permanent protection' situations which provide full enclosure (including continuous top and side barriers down to below ground level) and which are present and maintained over a number of years.
- (5) Reasonable precautions must be taken to prevent access of birds to treated crops.
- (6) To minimise airborne environmental exposure, vents, doors and other openings must be closed during and after application until the applied product has fully settled.
- (7) To protect birds and non-target insects and arthropods, all treated trees must not be planted out until at least 1 month after treatment.
- (8) Managers must carry out a thermal comfort checklist (see - <http://www.hse.gov.uk/temperature/assets/docs/thermal-comfort-checklist.pdf>) prior to worker re-entry tasks. If needed, an additional heat stress check list and associated risk assessment must be undertaken (see- <http://www.hse.gov.uk/temperature/assets/docs/heat-stress-checklist.pdf>) and the records retained. Temperature and humidity inside tunnels/greenhouses should be monitored during re-entry tasks. If conditions become such that there is a risk of heat related illness, or workers complain of ill effects, then work must cease until the risk is reduced. It is not acceptable for workers to remove clothing and continue working.

APPENDIX 2: GENERAL CONDITIONS FOR AN EXTENSION OF AUTHORISATION

Failure to comply with the following conditions will be likely to result in the withdrawal or amendment of the Extension of authorisation under Regulation No 1107/2009 and may result in other enforcement action, including prosecution.

Adverse effects:

The authorisation holder must immediately notify the Secretary of State, the Welsh Ministers and the Scottish Ministers, if they have any new information on the potentially adverse effects of the authorised product, or of residues of an active substance in that product when used in accordance with the conditions of this authorisation. Failure to comply with this requirement is an offence.

Provision of information:

The authorisation holder must comply with all requests for information required by, or on behalf of, the Secretary of State, the Welsh Ministers or the Scottish Ministers in accordance with Assimilated Regulation No 1107/2009.
